FOR IMMEDIATE RELEASE

APCERT CYBER DRILL 2019
“CATASTROPHIC SILENT DRAINING IN ENTERPRISE NETWORK”

The Asia Pacific Computer Emergency Response Team (APCERT) today has successfully completed its annual drill to test the response capability of leading Computer Security Incident Response Teams (CSIRT) within the Asia Pacific economies.

The theme of this year’s APCERT Drill is “Catastrophic Silent Draining in Enterprise Network.” This exercise reflects real incidents and issues that exist on the Internet. This year’s scenario was inspired by a latest security attack on an organization, which relates to the vulnerability that could allow attackers to completely take over vulnerable websites to deliver malware backdoor and cryptocurrency miners.

This drill included the need for the teams to interact locally and internationally, with CSIRTs/CERTs and targeted organizations, for coordinated suspension of malicious infrastructure, analysis of malicious code, as well as notification and assistance to affected entities. This incident response exercise, which was coordinated across many economies, reflects the collaboration amongst the economies in mitigating cyber threats and validates the enhanced communication protocols, technical capabilities and quality of incident responses that APCERT fosters in assuring Internet security and safety.

Throughout the exercise, the participating teams activated and tested their incident handling arrangements. This drill included the need for the teams to interact locally and internationally, with CSIRTs/CERTs and targeted organizations, for coordinated suspension of malicious infrastructure, analysis of malicious code, as well as notification and assistance to affected entities. This incident response exercise, which was coordinated across many economies, reflects the collaboration amongst the economies in mitigating cyber threats and validates the enhanced communication protocols, technical capabilities and quality of incident responses that APCERT fosters in assuring Internet security and safety.

26 CSIRTs from 20 economies of APCERT (Australia, Bhutan, Brunei Darussalam, People’s Republic of China, Chinese Taipei, Hong Kong, India, Indonesia, Japan, Korea, Lao People’s Democratic Republic, Macao, Malaysia, Mongolia, Myanmar, New Zealand, Singapore, Sri Lanka, Thailand, and Vietnam) participated in the drill.

About APCERT
APCERT was established by leading and national Computer Security Incident Response Teams (CSIRTs) from the economies of the Asia Pacific region to improve cooperation, response and information sharing among CSIRTs in the region. APCERT Operational Members consist of 30 CSIRTs from 21 economies. Further information about APCERT can be found at: www.apcert.org/
